

Could you do with
a change of air?

**14-day
FREE
trial period**

Do you know the feeling?

Headache • Catarrh • Feeling unwell, even nauseous
Tobacco smoke • Difficulty in concentration • Skin irritation

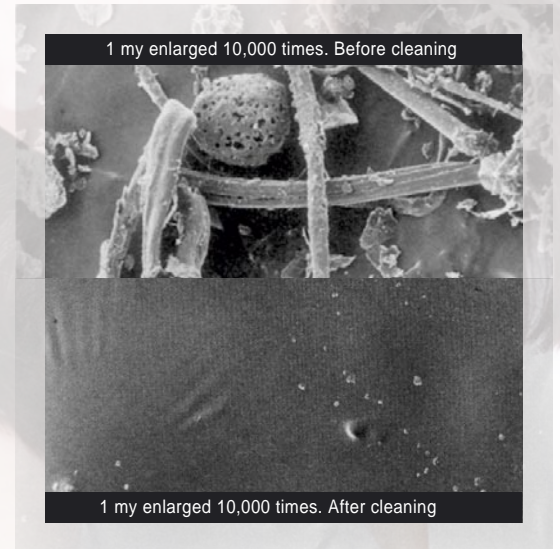

OptimAir *is the solution*
www.luftrenser.dk

Where it can be used

There is more and more particle pollution in the air, partly due to increasing use of computers and other business machines. You can put a stop to the particles with an OptimAir air cleaner, which will get rid of:

- Dust • Tobacco smoke • Viruses
- Dust mites • Pollen
- Bacteria • Fungus spores
- Fibres from people and animals
- Heavy metals, including from computers and other business machines

Clean air solves the problem

OptimAir creates perfect air circulation and combines the extremely effective electrostatic filter with an active carbon filter. Particle pollution, vapours and smells are all removed in record time - and both working environment and job satisfaction improve dramatically.

OptimAir is:

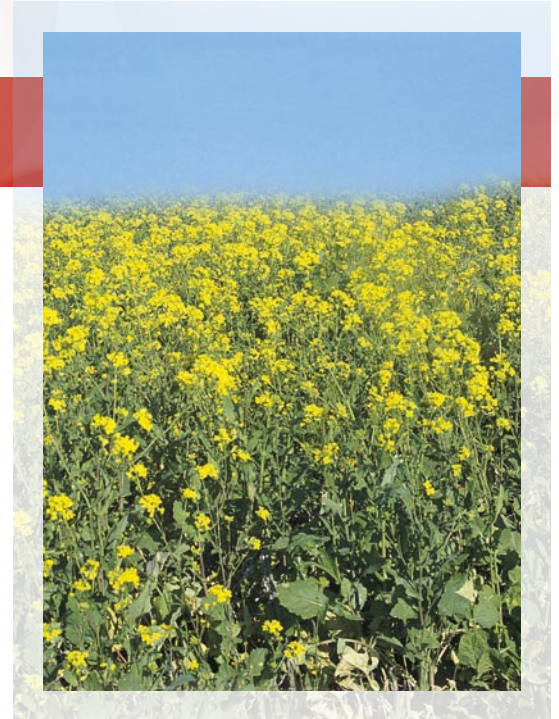

- Danish
- Low on noise and operational costs

In brief: "Clean air makes sense"

Air your problems

- ring right now or write, if you would like a recommendation on how you can get rid of your air pollution. We will gladly come out to you and a visit does not commit you in any way.
